

Zhejiang Changda Automobile Part Making Co., Ltd. adheres to the business philosophy of [Brake Shoe Assembly Manufacturer](#) sincerity, trustworthiness, and excellence, and has established a complete product research and development center and advanced testing equipment, equipped with a comprehensive CAD design and CAM manufacturing system. We have taken the lead in introducing high-precision equipment such as domestic first-class CNC batching systems, CNC weighing bag systems, CNC mold hot pressing, forming systems, and CNC grinding processing systems.

The product has passed IATF16949, EU R90 product quality management system certification, American Motor Vehicle Manufacturer Certification service agency AMECA product certification, American Green Testing Center DOT/FMVSS 121D, and South Africa SABS VC8503 testing recognition. Through advanced design and manufacturing, as well as

[Brake Pad Manufacturer](#) a comprehensive management system, product quality has been reliably guaranteed. We sincerely welcome communication and cooperation with domestic and foreign manufacturers.

WVA29087 Disc Brake Pads

Disc brake pads are an integral part of the disc brake system in vehicles. They are designed to create friction against the rotating brake disc (also known as a rotor) to slow down or stop the vehicle. Disc brake pads consist of a backing plate, which provides structural support and attachment points for the brake caliper, and the friction material that makes contact with the brake disc. Disc brake pads are subject to wear and should be regularly inspected and replaced as needed.

4551 BRAKE SHOE SERIES

Brake shoe assembly refers to the process of putting together the components of a brake shoe, which is an integral part of the braking system in vehicles. Brake shoes are used in drum brake systems to create friction against the brake drum, thereby slowing down or stopping the vehicle.

BENZ SERIES CD19580 Drum

Brake Lining

Applicable Vehicle: MAN, MERCEDES-BENZ

Applicable cars: MP/74/1

Product Size: 173.7*162.7*18/15.4

1. Non-asbestos
2. Squeal Free
3. Ultra-low dust
4. Extended life
5. Stable friction coefficient
6. Increased drum life

company name: Zhejiang Changda Automobile Part Making Co.,Ltd.

Add:No.309 Changhong East Street, Fuxi Subdistrict, Deqing County,
Huzhou City, Zhejiang Province, China
